Portfolio: diogo-resume.streamlit.app

Technical Business Analyst & Data Solutions Architect

I bridge the gap between complex data architecture and actionable business strategy. With over 15 years of experience across banking/financial operations, full-stack data, and customer experience, I specialize in translating business, regulatory, and user needs into scalable technological solutions. My background includes refactoring legacy systems supporting €70M+ in annual transaction volumes, developing Single Sources of Truth (SSOT), and aligning technical requirements with strategic goals in Agile environments. I operate at the intersection of engineering and product delivery, ensuring clear communication across cross-functional teams and driving product evolution through data-backed insights.

CORE COMPETENCIES & TECHNICAL STACK

- **Business Analysis & Product Delivery:** Requirements Gathering, User Stories & Acceptance Criteria, As-Is/To-Be Process Mapping, Functional Documentation, Backlog Refinement, UAT & Data Reconciliation, Agile/Scrum, Confluence & Jira/DevOps.
- **Data & Enterprise Analytics:** Advanced SQL (PostgreSQL, T-SQL, KQL), Google BigQuery, Microsoft Fabric, Azure Data Factory, Power BI, Apache Superset, Looker Studio, Data Mart Design (SSOT), KPI & Voice of Customer (VoC) Frameworks.
- **Technical & SaaS Ecosystems:** REST APIs, Webhooks, Serverless Microservices (GCP Cloud Run), Enterprise Integrations (SAP, Genesys, Avaya, Salesforce/CRM), Git, CI/CD (Cloud Build), Applied AI & NLP (RAG, Gemini/Vertex AI, Brandwatch), React.js & TypeScript.

PROFESSIONAL EXPERIENCE

Independent Product & Data Consultant | Lisbon, Portugal • 2025 – Present
Technical Business Analyst & Solutions Architect (Cloud/SaaS MVP Projects)

- **Product Definition & Requirements:** Translated operational bottlenecks into functional specifications, user stories, As-Is/To-Be workflows, and acceptance criteria across three cloud-based SaaS MVPs.
- **Technical Architecture & Delivery:** Connected product requirements with technical execution by designing serverless APIs/microservices, automated CI/CD pipelines, and a Medallion Data Lakehouse in BigQuery with hybrid AI validation rules to ensure data quality.
- **Tech & Tools:** GCP (BigQuery, Cloud Run, Cloud Build), REST APIs, Webhooks, SQL, Python, Vertex AI (Gemini), React.js, TypeScript, Git.

BringGlobal | Lisbon, Portugal • 2022 – 2025

Senior BI & Data Engineer / Technical Business Analyst

- **Regulated & High-Volume Ecosystems:** Mapped and optimized banking and pharmaceutical data ecosystems supporting 85+ retail pharmacies, laboratory integrations, and over €70M in annual transaction volume, ensuring compliance and data reconciliation.
- **Requirement Translation & System Refactoring:** Audited legacy business logic and operational bottlenecks, translating business needs into functional and technical specifications. Led the architectural rebuild (refactoring 5,000+ lines of SQL and reducing database tables by 50%) and prepared the migration roadmap to Microsoft Fabric.
- **Operational & Financial Impact:** Cut critical ETL processing times from 24 hours to 15 minutes and reduced architectural maintenance effort by 75% (from ~1,600h to ~400h/year), securing a €100k+/year contract and restoring reporting reliability for the CFO.
- **Cross-Functional Delivery (McKinsey):** Acted as the bridge between McKinsey strategy consultants and engineering teams to clarify requirements, unblock data dependencies, and deliver complex analytical models in Apache Superset within weeks for B2B telecom expansion.
- **Tech & Tools:** Advanced SQL, PostgreSQL, Microsoft Fabric, Azure Data Factory, Power BI, Apache Superset, PySpark, Erwin Data Modeler, Agile/Scrum.

IKEA | Lisbon, Portugal • 2014 – 2022

Customer Insights Lead & Business Data Architect

- **User Insights & Product Analytics:** Led the design of Voice of Customer (VoC) KPIs that informed the Global Performance framework. Analyzed customer feedback and user behavior (via NLP/Brandwatch and web telemetry) to identify operational pain points and structure the frontline Knowledge Base.
- **Cross-System Integration & SSOT:** Eliminated departmental silos ("Excel Hell") by integrating contact center telemetry (Avaya, Genesys) with core ERP/billing systems (SAP, OCP) into centralized Power BI Data Marts serving 400+ daily users.
- **Workflow Optimization & Operational Support:** Defined functional workflows, monitoring tools, and system requirements that enabled operational and sales teams to reduce sales errors from 30% to <7%, cut logistics costs by 20–30%, and increase Omnichannel SLA performance from <9% to >90%.
- **Change Management & Executive Alignment:** Maintained functional documentation, led user onboarding and training across operations, and partnered with executive leadership using Cost-to-Serve and root-cause analysis (including SEM modeling) to link operational quality to national P&L margins.
- **Tech & Tools:** Power BI, SQL, SAP, OCP, Genesys, Avaya, Brandwatch (NLP), Data Marts (SSOT), Process Mapping & Documentation.

Banco BPI & Central de Cervejas | Portugal • Up to 2014

Sales & CX Operations Analyst

- **Banking & Commercial Foundation:** Managed B2B portfolios and frontline banking customer

service at Banco BPI, building a strong foundation in financial products, credit/commercial workflows, and translating end-user pain points into reporting requirements.

EDUCATION

Post-Graduate Degree in Digital Enterprise Management | Nova Information Management School (Nova IMS)
Master of Science in Management (Thesis: 18/20) | ISEG - Lisbon School of Economics and Management
Bachelor of Science in Political Science | ISCSP - University of Lisbon
